

Health Seminar

Car Seat Safety Clinic

Date	Thursday, May 30, 4 – 7 p.m.
Location	Hudson Hospital & Clinics Located at the maintenance garage next to the hospital
Cost	Free
Presenter	West Central Regional Trauma Advisory Council, Regions Hospital and Hudson Hospital Emergency Center
Registration	Required. A limited number of 30-minute appointments are available. Call (715) 531-6250 for your appointment and further directions.

**Please bring with you: car seat, car seat manual, vehicle manual, child that will use the seat, and plan on 30 minutes per seat, per vehicle.*

Active lifestyles today require responsible vehicle safety, and this includes having your child car seat checked to ensure it meets proper safety regulations. Attend this car seat safety clinic sponsored by West Central Regional Trauma Advisory Council, Regions Hospital and Hudson Hospital Emergency Center.

Nine out of 10 child car seats are installed or used incorrectly posing a threat to your child's safety in the event of a car accident. During this free clinic, certified child passenger safety technicians will evaluate your car seats for defects, recalls, suitability for the age and size of the child, and fit with the safety belt system in your vehicle. Parents and caregivers are asked to bring the car seat and the child who uses the seat to achieve the best possible fit.
