

Patients & Visitors:

Construction for a new roundabout at the Hudson Hospital & Clinics campus entrance is expected from **August 6 through mid-September**. The new roundabout has been determined to be the safest traffic system for entering and exiting the health campus, as well as through traffic on Stageline Road.

Access to the hospital and clinics for patients and visitors will be available from Stageline Road. Signage will help guide traffic to and from the campus. Stageline Road just east of the hospital entrance to O'Neil Road will be closed. Between O'Neil Road and old Hwy 35 access will be closed to *through* traffic (open to local residents only). Traffic between Carmichael and old Hwy 35 will be detoured to Hanley Road.

Thank you for your patience and understanding as we continue to grow and provide a safe entrance to the hospital campus.
